DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Due to the variables in the claims, e.g. R¹, R⁴ and their widely divergent meanings, a precise listing of inventive groups cannot be made.

The following groups are exemplary:

Group I claim(s) 1-29 (in part), drawn to compounds of formula wherein R⁴ is heteroaromatic moiety.

Group II claim(s) 1-29 (in part), drawn to compounds of formula wherein R⁴ is amine.

Group III claim(s) 1-29 (in part), drawn to compounds of formula wherein R⁴ is acylsulfonamide.

Group IV claim(s) 1-29 (in part), drawn to compounds of formula wherein R⁴ is carboxylic acid amide.

Note that Group I can be further classified into many Groups. For example, pyridines, pyrimidines, azepines, thiazoles, etc. that are heteroaromatic moieties would belong to different groups.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted. Again, this list is not exhausted, as it would be impossible under the time constraints due to the sheer

Art Unit: 1624

1

volume of subject matter instantly claimed. Therefore, applicant may choose to elect a single invention by identifying another specific embodiment not listed in the exemplary groups of the invention and examiner will endeavor to group the same. If applicant is unable to elect a single invention, applicant may instead choose to elect a specific compound and examiner will attempt to group it. The claims herein lack unity of invention under PCT Rule 13.1 and 13.2 since the compounds defined in the claims lack a significant structural element qualifying as the special technical feature that defines a contribution over the prior art. The compounds claimed in claims 1-22 have a structure phenyl-o-phenyl, which does not define a contribution over the prior art. The substituents on the phenyl-o-phenyl vary extensively and when taken as a whole result in vastly different compounds. Accordingly, unity of invention is considered to be lacking and restriction of the invention in accordance with the rules of unity of invention is considered to be proper. Additionally, the vastness of the claimed subject matter and the complications in understanding the claimed subject matter imposes a burden on any examination of the claimed subject matter.

A telephone call was made to Mr. Todd Garabedian on 11/01/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in

Application/Control Number: 09/868,889

Art Unit: 1624

the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kahsay Habte, Ph. D. whose telephone number is (703) 308-4717. The examiner can normally be reached on M-F (9.00AM- 5:30PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mukund Shah can be reached on 703-308-4716. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-4556.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1235.
